

D-2 Incorporated

JP-8 Fuel Additive Injection System MIL-DTL-83133 SDA / CI /FSII

Part Number: AI-JP-8

Revision 1: 05/09/19

Drawing Number: JP-8 Product Brochure

General Features of the D-2 Injection Systems

- 1. Real Time Control of Neat Additive injection for SDA, CI, or FSII. Modular design allows for all three additives or any combination in the same cost effective package.
- Ensures your facility is meeting the MIL-DTD-83133 specification for Static Dissipative Additive (SDA) / Corrosion Inhibitor (CI) and Fuel System Icing Inhibitor (FSII).
- 3. System can be tied directly into a DCS system such as "Top Tech" or "Guardian" fuel terminal management software. Allows for standard terminal operator oversight. As required BOL printed results.
- Uses only NEAT Additive for injection, eliminating the need for additive dilution and mixing prior to injection. Full mass flow real time control based on product line flow rate.
- 5. Full documentation package provided with every skid, including PI&D's, foundation, sensor /injector mounts, installation/check off manual, user manual, and AB Studio 5000 PLC Source Code. See example drawings on page 4.
- Full Stainless Steel System, weather protected pumps built to your custom site specifications, results in low cost installation combined with low long term

D-2 Inc. provides JP-8 Additive Injection Systems. Real time control of Neat

maintenance costs.

- 7. Conductivity measured safety circuit provided by ASTM D2624 approved real time direct measurement of conductivity.
- Modular all Stainless Additive storage tanks provided maintain additive supplied with visual level and optional low level alarms connected directly to terminal systems to further prevent run dry incidents.
- 9. Fully ATEX or FM/ FMc Certified for use in Hazardous Zone Environments.
- Optional In Line Conductivity Sensor JF-1A is ASTM D2624 Listed and ATEX/ FM Certified. Optional Item for real time monitoring of conductivity.
- 11. Custom injection nozzle prevent idle time flow out and ensure well mixed additive/product.
- D-2 Inc. fully supports every system and provides a 1 year limited warranty from date of install, can provide on-site commissioning.
- 13. D-2 Inc. is a highly experienced firm with multiple AI-1 Injection systems operating globally with a perfect track record.
